Changes in Investment Pattern:

The above asset allocation pattern is not absolute and can vary depending upon the AMC's perception of the markets. The asset allocation pattern indicated above may thus be altered substantially on defensive considerations.

Subject to the SEBI Regulations, the asset allocation pattern of the schemes indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors.

It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive consideration only.

Pursuant to SEBI circular no. IIMARP/MF/CIR/01/294/98 dated February 04, 1998, and SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021, the tentative portfolio break-up mentioned above with minimum and maximum asset allocation can be altered for a short-term period on defensive considerations. In this event where the asset allocation falling outside the limits specified in the asset allocation table due to defensive considerations (active breaches), the Scheme will rebalance the portfolio within thirty (30) days. However, justification for the same shall be provided to the Investment Committee in writing. The Investment Committee shall then decide on the course of action.

Further pursuant to SEBI circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022, in the event where the asset allocation is falling outside the limits specified in the asset allocation table due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Scheme will rebalance the portfolio within thirty (30) business days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of thirty (30) business days, justification in writing including details of efforts taken to rebalance the portfolio for the same shall be provided to the Investment Committee. The Investment Committee shall then decide on the course of action and if they so desires can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. Further, compliances relating to disclosures etc. shall be adhered in line with the said circular.

In line with abovementioned SEBI circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022, AMC shall report the deviation to Trustees at each stage. Further, in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme:

- AMCs shall immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced.
- AMCs shall also immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced.

AMCs shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

It may please be noted that the AMC shall adhere to all the SEBI guidelines regarding the rebalancing of the asset allocation as stipulated from time to time.

Exposure to Derivatives:

The Scheme shall follow exposure limits on Derivatives as per the exposure limits permitted under the SEBI Regulations and circulars issued from time to time and shall be within the limits prescribed by the Board of Trustees. SEBI vide its circular no. DNPd/Cir-29/2005 dated September 14, 2005, permitted mutual funds to participate in derivatives trading subject to the observance of guidelines issued by SEBI. Mutual Funds are permitted to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, the mutual funds shall be treated at par with a registered FII in respect of position limit in index futures, index options, stock options and stock futures contracts. The Mutual Fund will be considered as trading members like registered FIIs, and the schemes of Mutual Funds will be treated as clients like sub-accounts of FIIs. As a part of the fund management process, the AMC may use appropriate derivative instruments in accordance with the investment objectives of the Scheme and as per procedure prescribed under the stated circular.

Inter Scheme Transfers ("IST") of Securities:

As per the provisions of SEBI circular dated 8th October 2020, ISTs may be allowed in the following scenarios:

a) For meeting liquidity requirement in a scheme in case of unanticipated redemption pressure:

AMC shall have an appropriate Liquidity Risk Management (LRM) Model at scheme level, approved by Trustees, to ensure that reasonable liquidity requirements are adequately provided for. Recourse to ISTs for managing liquidity will only be taken after the following avenues for raising liquidity have been attempted and exhausted:

- I. Use of scheme cash & cash equivalent
- II. Use of market borrowing
- III. Selling of scheme securities in the market
- IV. After attempting all the above, if there is still a scheme level liquidity deficit, then out of the remaining securities, outward ISTs of the optimal mix of low duration paper with highest quality shall be affected.

The use of market borrowing before ISTs will be optional and Fund Manager may at his discretion take decision on borrowing in the best interest of unitholders. The option of market borrowing or selling of security as mentioned at point II & III above may be used in any combination and not necessarily in the above order. In case option of market borrowing and/or selling of security is not used, the reason for the same shall be recorded with evidence

b) For Duration/ Issuer/ Sector/ Group rebalancing.

- I. ISTs shall be allowed only to rebalance the breach of regulatory limit.
- II. ISTs can be done where any one of duration, issuer, sector and group balancing is required in both the transferor and transferee schemes. Different reasons cannot be cited for transferor and transferee schemes except in case of transferee schemes is being a Credit Risk scheme.
- III. In order to guard against possible misuse of ISTs in Credit Risk scheme, Trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in process of ISTs in Credit Risk scheme, in case the security becomes default grade after the ISTs within a period of one year. Such negative impact on performance shall mirror the existing mechanism for performance incentives of the AMC.

No ISTs of a security shall be allowed, if there is negative news or rumours in the mainstream media or an alert is generated about the security, based on internal credit risk assessment in terms of clause F of SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2019/104 dated October 01, 2019, during the previous four months.

If security gets downgraded following ISTs, within a period of four months, Fund Manager of buying scheme has to provide detailed justification /rationale to the Trustees for buying such security.

AMC shall ensure that Compliance Officer, Chief Investment Officer and Fund Managers of transferor and transferee schemes have satisfied themselves that ISTs undertaken are in compliance with the regulatory requirements. All documentary evidence and required Template in this regard shall be maintained by the AMC for all ISTs.

Investment Strategy

The scheme being an open-ended mid cap equity scheme, it would aim to generate long-term capital appreciation through an actively managed portfolio having significant exposure in mid cap market capitalisation companies present across sectors. The scheme will intend to build a well-diversified portfolio of companies present across sectors with a long-term perspective. As per the regulatory requirement, the scheme would invest a minimum of 65% of total assets in equity & equity related instruments of mid cap companies. The remaining exposure of the total asset allocation would be based on the investment manager's views in line with asset allocation pattern of the scheme and accordingly allocated across the market capitalisation and/or debt and money market instruments. The fund may follow a bottom-up approach towards analysing and investing in individual companies and a top-down approach towards identifying and taking exposure across sectors. The investment emphasis of the scheme would be in identifying companies with strong competitive position in good business and which have quality management.

The AMC would follow an active investment style supported by in-house research. Essentially, the focus would be on fundamentally strong companies with scope for growth over time. The AMC, in selecting the scrips would focus on the fundamentals of the business, the industry structure, the quality of management sensitivity to economic factors, the financial strength of the company and the key earning drivers. The Scheme may from time to time hold cash / cash equivalents for the purpose of derivative investments and for meeting liquidity requirements.

Investment Pattern and Changes

Please refer the section on Asset Allocation Pattern of the Scheme.

The term Investment pattern is defined as the tentative portfolio break-up of Equity, Debt, Money Market Instruments, other permitted securities and such other securities as may be permitted by the Board from time to time with minimum and maximum asset allocation, while retaining the option to alter the asset allocation for a short term period on defensive considerations.

Under normal circumstances, the investment pattern outlined in section on Asset Allocation Pattern of the scheme shall always prevail. However, it is to be noted that the investment pattern mentioned above is only indicative and may be changed by the Investment Manager for defensive considerations subject to portfolio rebalancing clause and in accordance with change in Regulations from time to time, under the following circumstances:

1. During extreme volatility / ill-liquidity in the capital market/securities market.
2. In case of natural calamity, strikes, riots, bandhs etc., affecting the valuation of security.
3. Declaration of war or occurrence of insurgency, or any other serious or sustained financial, political, or industrial emergency or disturbance, resulting in liquidity crunch.
4. During the time, the Fund receives bulk repurchase and/or bulk investment.

A review will be made as and when such variation takes place, and, if the variation is beyond 10%, the reasons thereof will be recorded. The variation from the stated asset allocation will be constantly monitored and such variation will be brought down to the specified asset allocation levels as soon as normalcy is restored. A report of such variations will be made to the Board of the AMC and the Trustees on a regular basis.

Procedure followed for investment decisions

The Fund Manager of the Scheme is responsible for making buy / sell decisions for the Scheme's portfolio and seeks to develop a well-diversified portfolio taking into account the asset allocation patterns of other schemes along with risks that are associated with such investments. The investment decisions are made on an ongoing basis keeping in view the market conditions and other regulatory aspects.

The AMC has constituted an Investment Committee, currently comprising of the CEO, COO, Head of Risk Management, Head of Equities and Head of Fixed Income that meets at periodic intervals. The Investment Committee's role is to formulate broad investment strategies for the Scheme, review the performance of the Scheme and the general market outlook.

The Fund Manager is responsible for facilitating investment debate and a robust investment culture. The investment team would hold ongoing meetings as well as additional ad-hoc meetings as needed, to explore the investment thesis.

It is the responsibility of the AMC to seek to ensure that the investments are made as per the Regulatory guidelines, the investment objective of the Scheme and in the interest of the Unit holders of the Scheme.

The AMC will keep a record of all investment decisions in accordance with the guidelines issued by SEBI.

The AMC and Trustees will review the performance of the scheme in their Board meetings. The performance would be compared with the performance of the benchmark index and with peer group in the industry.

Risk Mitigation

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in portfolio construction process. Stock specific risk will be minimized by investing only in those companies that have been thoroughly analyzed by the AMC.

Through adequate diversification of the portfolio, the AMC tries to reduce the risk. Diversification will also be achieved by spreading the investments over a diverse range of industries / sectors. The Scheme generally does not intend investing in illiquid and unlisted equity related securities. However, if the case merits, the Scheme may invest in such securities adhering to prudential norms on a case to case basis. The investments may be made in primary as well as secondary markets and the portfolio will be adequately diversified.

The Scheme being open ended, some portion of the portfolio may be invested in Money Market Instruments so as to meet the normal repurchase requirements. The remaining investment will be made in securities which are either expected to be reasonably liquid or of varying maturity. However, the NAV of the Scheme may be affected, if the securities invested in are rendered illiquid after investment.

In addition, the Investment Manager will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The Investment Manager would use this analysis to assess the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

The Scheme may use derivatives instruments like Stock/ Index Futures or Options, Interest Rate Futures, Interest Rate Swaps, Forward Rate Agreements, or such other derivative instruments as may be introduced from time to time for the purpose of hedging or portfolio balancing or any other purpose as allowed under the regulations, within the permissible limit of the portfolio, which may be increased as permitted under the Regulations and guidelines from time to time.

Liquidity, ex-ante tracking error, VaR and Limits on sectoral and scrip exposures will be monitored on an ongoing basis to ensure that they are all within the defined regulatory/internal limits. Monthly scenario analysis will be done on the portfolio and results shall be shared with the investment team for them to take suitable action, if deemed necessary. In addition, the scheme's performance vis-a-vis the benchmark will also be reviewed by the investment committee.

As a prudent measure, the AMC has broad internal investment norms and investments made through the scheme would be in accordance with the investment objectives of the schemes and provisions of SEBI Regulations

Portfolio Turnover Policy:

Purchase and Sale of securities attract transaction costs of the nature of brokerage, stamp duty, custodian transaction charges etc. The portfolio turnover is essential to regularly explore trading opportunities to optimize returns for the Scheme and enable portfolio restructuring when required.

The Scheme will manage its portfolio taking into account the associated risks (such as interest / liquidity / redemption etc.) perceived / expected, so as to mitigate the risks by using adequate risk management techniques. The portfolio turnover policy will be aimed at enhancing the returns/growth.

The Scheme is open ended, with subscriptions and redemptions expected on a daily basis, resulting in net inflow/outflow of funds, and on account of the various factors that affect portfolio turnover; it is difficult to give an estimate, with any reasonable amount of accuracy. Therefore, the Scheme has no specific target relating to portfolio turnover.

Pursuant to Schedule IX read with Regulation 50 of the SEBI (Mutual Funds) Regulations, 1996, the cost of investments acquired or purchased shall include all such costs incurred for effecting the transaction while the sale proceeds of investment sold or redeemed shall be net of all such costs incurred for effecting the sale transactions and shall form part of the purchase or the sale value of investments

Underwriting:

The scheme will not accept underwriting and sub underwriting obligations.

Stock/Securities Lending by the Fund:

The Fund may in future carry out stock/securities lending activity under any of its Schemes, in order to augment its income. Stock/securities lending may involve the risk of default such as loss, bankruptcy etc. on the part of the borrower. However, this is unlikely to happen if the stock/securities lending is carried out for stocks/securities which are in dematerialized form and through an authorized stock/securities lending Scheme which is subject to appropriate regulation. Any stock/securities lending done by the Scheme shall be in accordance with any regulations or guidelines regarding the same. The policy to be followed for stock/securities lending shall be approved by the Board of Directors of the Investment Manager as well as by the Board of Trustees.

Hedging and Derivatives:

The scheme intends to use derivatives as may be permitted under the Regulations from time to time. The same shall be within the permissible limit prescribed by SEBI (Mutual Fund) Regulations from time to time.

As a part of the fund management process, the AMC may use appropriate derivative instruments in accordance with the investment objectives of the Scheme and in accordance with SEBI Regulations as may be applicable from time to time.

SEBI has also vide circular DNDP/Cir-29/2005 dated 14th September 2005 permitted Mutual Funds to participate in the derivatives market at par with Foreign Institutional Investors (FII). Accordingly, Mutual Funds shall be treated at par with a registered FII in respect of position limits in index futures, index options, stock options and stock futures contracts. The Fund shall comply with the guidelines issued by SEBI and amendments thereof issued from time to time in derivative trading.

Risk Profile of the scheme

- I. Mutual Fund Investments are subject to market risks, read all scheme related documents carefully.
- II. Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- III. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- IV. As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down.
- V. The past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- VI. The name of the Scheme does not in any manner indicate either the quality of the Scheme, its future prospects or returns.

VII. Canara Bank and ORIX Corporation Europe N.V (formerly Robeco Groep N. V.), being the Sponsors, are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 10 Lacs made by it towards setting up Canara Robeco Mutual Fund.

VIII. The present scheme is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors:

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

I. Risks associated with investment in Equity and Equity related instruments

Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for divestment. All investments involve risks and there can be no guarantee against loss resulting from an investment in any share of the Scheme, nor is there any assurance that the Scheme's investment objective will be attained in respect of its overall performance. In certain circumstances the right of the investors of the Scheme may be suspended. Consequently, the NAVs of units issued under the Scheme may be adversely affected.

Further, the Equity and Equity Related Instruments are risk capital and are subordinate in the right of payment to other securities including debt securities, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The Fund Manager of the Scheme may invest in the Securities of smaller, lesser-known companies. These investments may involve greater risk and the possibility of greater portfolio price volatility than investing in larger, more mature or better-known firms. Amongst other reasons for the greater price volatility of Securities of small companies and unseasoned stocks are the less certain growth prospects of smaller firms, the lower degree of liquidity of the markets for such stocks, and the greater sensitivity of small companies to changing economic conditions. For example, these companies are associated with higher investment risk than that normally associated with larger firms due to the greater business risks of small size and limited product lines, markets, distribution channels and financial and managerial resources. Such Securities, including those of newer or recently restructured companies or those which may have experienced financial difficulties, may be more volatile in price than larger capitalized stocks. Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options.

The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

The value of the Scheme investments may be affected by factors affecting capital markets generally, such as price and volume volatility in the stock markets, interest rates, currency exchange rates, foreign investments, changes in government policy, political, economic, or other developments and closure of the stock exchanges.

Investment made in unlisted equity or equity-related securities may only be realisable upon listing of these securities.

Trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity related securities. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The length of the settlement may affect the Scheme in the event the Scheme has to meet large number of redemptions.

II. Risks associated with investments in Fixed Income Securities

Price-Risk or Interest - Rate Risk: Fixed income securities such as government bonds, corporate bonds and money market instruments and derivatives run price - risk or interest - rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities may carry re - investment risk as interest rates prevailing on the coupon payment or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.

Credit Risk: This is the risk associated with the issuer of a debenture / bond or a money market instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent. Corporate bonds carry a higher amount of credit risk than Government securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern e.g., corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively riskier than bonds, which are AAA rated.

III. Risk associated with investing in Derivatives

As and when Schemes trade in the derivatives market, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risk in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Derivatives can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

The risk associated with the use of derivatives is different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in the losses that significantly exceed the Scheme's original investment. Certain derivatives may give rise to a form of leverage. Due to the low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, the Scheme may be more volatile than if the Scheme had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of the Scheme's portfolio. A relatively small price movement in a derivative contract may result in substantial losses to the investor.

Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful; resulting in losses to the Scheme and the cost of such strategies may reduce the Scheme's returns and increase the Scheme's potential for loss.

The Scheme may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management. The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared.

Trading in derivatives has the following risks:

- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- An exposure to derivatives can also limit the profits from a genuine investment transaction.
- Efficiency of a derivative market depends on the development of a liquid and efficient market for underlying securities.

d) Particular Risks of Exchange Traded Derivative Transactions

The securities exchange on which the shares of the Scheme may be listed may have the right to suspend or limit trading in all securities which it lists. Such a suspension would expose the Scheme to losses and delays in its ability to redeem shares of the Scheme.

e) Stock Market Fluctuations

Investors may note that the value of their investment may fall as well as rise and they may get back less than they originally invested. The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

f) Income Distribution cum Capital Withdrawal

The Scheme may distribute not only investment income, but also realized capital gains or capital. Where capital is distributed, this will result in a corresponding reduction in the value of shares of the Scheme, and a reduction in the potential for long-term capital growth.

g) Warrants

The Scheme may invest in warrants, the values of these warrants are likely to fluctuate more than the prices of the underlying securities because of the greater volatility of warrant prices.

h) Futures and Options

The Scheme may use options and futures on securities, indices and interest rates for the purpose of efficient portfolio management. Transactions in futures and options carry a high degree of risk. A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

i) Listing

In case the shares of the Scheme are listed, the exchanges on which those shares are listed will have no responsibility for the contents of any prospectus issued by the Scheme or will make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any kind of loss arising from or in reliance upon any part of any such prospectus.

IV. Risks Associated with investing in Money Market Instruments

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's inability to meet interest and principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, the general level of market liquidity and market perception of creditworthiness of the issuer of such instruments.
- The NAV of the Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

V. Risk associated with Securities Lending

Securities lending may involve the risk of default on the part of the borrower. However, this is unlikely to happen if the stock lending is carried out for stocks which are in dematerialized form and through an authorized stock lending scheme, subject to appropriate Regulations. The Investment Manager perceives such situations to be exceptional in nature. Although the Stock Market in India is still developing, considering the good demand for listed / quoted Equity Shares of reputed companies, the Scheme(s) may choose to meet repurchase needs through temporary borrowings, within the permissible limits.

VI. Risk Factors Associated with Investments in REITs and InvITs

- Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.
- Liquidity Risk:** As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or payout of Income Distribution cum Capital Withdrawal, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc. may differ from existing capital market asset classes under Indian Law.

VII. Risk associated with Investing in Foreign Securities:

For investments in American Depository Receipts (ADRS) / Global Depository Receipts (GDRs) and such other offshore investments (as and when permitted), the market values of which depend generally on factors such as multi-currency, multi-market situations, political / economic factors and international regulations.

Currency Risk: Investment in other currencies involves currency risks. The Scheme's exposure in foreign securities, income distributions etc. may be adversely affected due to change in the exchange rates of such foreign currencies in relation to Indian Rupee.

Interest Rate Risk: The pace and movement of interest rate cycles of various countries can differ significantly leading to an exposure to their interest rates.

Credit Risk: Though the investments in overseas securities are subject to credit risks, this is substantially reduced as investments are made only in rated securities as stipulated under the regulations.

VIII. Risk associated with investing in Securitised Debt

The Scheme may invest in domestic securitized debt such as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties.

At present in Indian market, following types of loans are securitized:

1. Auto Loans (cars / commercial vehicles / two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans
5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn may witness higher default. A corporate loan / receivable, depend upon the nature of the underlying security for the loan or the nature of the receivable and the risks correspondingly fluctuate.

The rating agencies define margins, over collateralization and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows.

- a) **Assets securitized and Size of the loan:** This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.
- b) **Diversification:** Diversification across geographical boundaries and ticket sizes might result in lower delinquency.
- c) **Loan to Value Ratio:** Indicates how much % value of the asset is financed by borrower's own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.
- d) **Average seasoning of the pool:** This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is.

The other main risks pertaining to Securitised debt are as follows:

1. **Prepayment Risk:** This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABSs. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.
2. **Reinvestment Risk:** Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.
3. **Risks associated with Short Selling:** Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e., sale of securities without owning them) entails the risk of the security price going up there by decreasing the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact fund pricing and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being.

IX. Risk factors associated with investing in Tri Party Repo through CCIL (TREPS):

All the market repo and Tri-party repo are settled through Clearing Corporation of India Limited (CCIL). CCIL acts as a Central Counterparty (CCP) to all trades received for settlement.

Risk of exposure in the TREPS, Repos & Reverse Repos in Government Securities/Treasury Bills emanates mainly on two counts –

- a. Risk of failure by a lender to make funds available or by a borrower to provide adequate collateral security to accept the fund at the first leg of borrowing and lending under Tri-party Repo transaction or Repo transactions in Government Securities / treasury Bills.
- b. Risk of default by a borrower in repayment.

X. Risk factors associated with Creation of Segregated Portfolio

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprising of segregated portfolio may not realise any value. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

XI. Other Risks

a) Stock Market Fluctuations

Investors may note that the value of their investment may fall as well as rise and they may get back less than they originally invested. The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

b) Income Distribution cum Capital Withdrawal

The Scheme may distribute not only investment income, but also realised capital gains or capital. Where capital is distributed, this will result in a corresponding reduction in the value of shares of the Scheme, and a reduction in the potential for long-term capital growth.

c) Warrants

The Scheme may invest in warrants; the values of these warrants are likely to fluctuate more than the prices of the underlying securities because of the greater volatility of warrant prices.

In the event of substantial investment by the Sponsor/s, or its associates in the Scheme, any redemption by these entities may have an impact on the performance of the Scheme.

Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme or for any amendments in the tax laws that may affect the tax benefits available under the Scheme. The tax benefits are based on the present laws and rules in force.

Growth Option

Under this option, no IDCW will be declared. The income attributable to units under this option will continue to remain invested and will be reflected in the NAV of the units under this option.

Payout of Income Distribution cum Capital Withdrawal Option

Income Distribution cum Capital Withdrawal (IDCW), if declared, will be paid (subject to deduction of tax at source, if any) to those Unit holders whose names appear in the Register of Unit holders on the notified record date. The Trustees / AMC reserves the rights to change the record date from time to time. However, it must be distinctly understood that the actual declaration of IDCW and the frequency thereof will inter-alia, depend on the availability of distributable profits as computed in accordance with SEBI (MF) Regulations. The decision of the Trustees in this regard shall be final. There is no assurance or guarantee to Unit holders as to the rate of IDCW nor will that IDCW be paid regularly. In order to be a Unit holder, an investor has to be allotted Unit against receipt of clear funds by the Scheme. On payment of IDCW, the NAV will stand reduced by the amount of IDCW and tax (if applicable) paid.

The unit holders have the option to reinvest the IDCW declared by the Scheme. Such unit holders opting to reinvest the IDCW receivable by them shall invest in additional units of the Scheme. Upon exercising such option, the IDCW due and payable to the unit holders will be compulsorily and without any further act by the unit holders reinvested in the Scheme.

The IDCW so reinvested shall be constructive payment of IDCW to the unit holders and constructive receipt of the same amount from each unit holder, for reinvestment in units.

On reinvestment of Income Distribution cum Capital Withdrawal, the number of units to the credit of unit holder will increase to the extent of the IDCW reinvested by the first 'Ex-income Distribution NAV' on the day of reinvestment as explained above.

Income Distribution cum Capital Withdrawal (IDCW) Policy

The Scheme may distribute, surplus if any, by way of IDCW, as may be decided by the Trustees from time to time. As per the provisions of Para 11.2 of SEBI Master Circular for Mutual Funds dated May 19, 2023, IDCW can be distributed out of the investor's capital (Equalization Reserve), which is part of sale price that represents realized gains. Whenever distributable surplus will be distributed, a clear segregation between income distribution (appreciation on NAV) and capital distribution (Equalization Reserve) shall be suitably disclosed in the Consolidated Account Statement provided to investors as required under Regulation 36(4) of SEBI (Mutual Funds) Regulations, 1996 and Para 11.3 of SEBI Master Circular for Mutual Funds dated May 19, 2023.

The IDCW proceeds will mandatorily be paid directly into the Unitholder's bank account through various electronic payout modes such as Direct credit/ NEFT/RTGS/IMPS/ECS/NECS etc, as directed by SEBI. Please note that physical dispatch of IDCW payment instruments shall be made by the AMC only in exceptional circumstances as specified by SEBI.

The proceeds will be paid in favour of the Unit holder (registered holder of the Units or, if there is more than one registered holder, only to the first registered holder) with bank account number furnished to the Mutual Fund (please note that it is mandatory for the Unit holders to provide the Bank account details as per the directives of SEBI).

If there is no distributable surplus or surplus amount is too small for distribution, in the opinion of the Trustees, the Dividend (IDCW) declaration may not take place. The Scheme is not assuring or guaranteeing any IDCW or returns.

IDCW, if declared, shall be dispatched to the unitholders within 15 days from the record date.

The IDCW declared out of the Distributable Surplus of the Scheme will be paid net of tax deducted at source (TDS), to those unit holders whose names appear in the register of unit holders

Pursuant to payment of IDCW, the NAV of the Income Distribution cum Capital Withdrawal Option of the scheme would fall to the extent of payout and statutory levy (if applicable). In the event of failure to dispatch dividend payments within the stipulated time period in terms of Regulation 53(a) of MF Regulations, it is clarified that the interest (currently @ 15% p.a.) for the delayed payment of dividend (IDCW) shall be paid. Interest for the delayed payment of dividend (IDCW) shall be calculated from the record date.

IDCW/Dividend Distribution Procedure: In accordance with Chapter 11 of SEBI Master circular for Mutual funds dated May 19, 2023, as amended from time to time, the procedure for IDCW/ Dividend Distribution would be as under:

2. Within one calendar day of decision by the Trustees, the AMC shall issue notice to the public communicating the decision about the IDCW including the record date, in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the head office of the Mutual Fund is situated.
3. Record date shall be the date, which will be considered for the purpose of determining the eligibility of investors whose names appear on the register of unit holders for receiving IDCW. The record date shall be 2 working days from the date of publication in at least one English newspaper or in a newspaper published in the language of the region where the Head Office of the mutual fund is situated, whichever is issued earlier.

6. Before the issue of such notice, no communication indicating the probable date of IDCW declaration in any manner whatsoever will be issued by Mutual Fund.

Reinvestment of Income Distribution cum Capital Withdrawal Option:

The unit holders have the option to reinvest the Dividend declared by the Scheme. Such unit holders opting to reinvest the IDCW receivable by them shall invest in additional units of the Scheme. Upon exercising such option, the IDCW due and payable to the unit holders will be compulsorily and without any further act by the unit holders reinvested in the Scheme.

The IDCW so reinvested shall be constructive payment of IDCW to the unit holders and constructive receipt of the same amount from each unit holder, for reinvestment in units. On reinvestment of IDCW, the number of units to the credit of unit holder will increase to the extent of the IDCW reinvested divided by the first 'Ex-income Distribution NAV' on the day of reinvestment as explained above. There shall, however, be no entry load on the IDCW so reinvested.

Threshold Limit for 'Payout of Income Distribution cum Capital Withdrawal Option':

If the IDCW amount payable to the unit holders under the 'Payout of Income Distribution cum Capital Withdrawal Option' under a folio is less than or equal to Rs. 250/- and where complete bank account details are not provided by the unitholders, then such amount will be compulsorily reinvested wherever reinvestment option is available under the scheme and an account statement will be sent to the investors at their Registered Address. The IDCW shall be re-invested at the prevailing ex-dividend Net Asset Value per Unit on the record date. There shall be no Exit Load on the IDCW so reinvested. The IDCW so reinvested shall constitute a constructive payment of IDCW to the Unit holders and a constructive receipt of the same amount from each Unit holder for reinvestment in Units.

Investment of unclaimed redemption and IDCW amounts of the schemes of the CRMF:

20. Real Time Gross Settlement (RTGS) & National Electronic Funds Transfer (NEFT)
The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' & 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India(RBI), which aims to provide credit of redemption and IDCW payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/NEFT System). Unit holders can check the list of banks participating in the RTGS/NEFT System from the RBI website i.e. www.rbi.org.in or contact any of our Investor Service Centres.

However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/NEFT' updated on RBI website www.rbi.org.in, from time to time, the instructions of the Unit holder for remittance of redemption/IDCW (if any) proceeds via RTGS/NEFT System will be discontinued by Canara Robeco Mutual Fund/ Canara Robeco Asset Management Company Limited without prior notice to the Unit holder and the payouts of redemption/IDCW (if any) proceeds shall be effected by sending the Unit holder(s) a cheque/demand draft.

For more details on NEFT or for frequently asked questions (FAQs) on RTGS/NEFT, Unit holders are advised to visit the RBI website www.rbi.org.in Electronic Clearing Service (ECS)*

Investors who have opted for the ECS facility of RBI for IDCW payment will receive a direct credit of the amount due to them in their mandated account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS will be sent to the unit holder. It should be noted that while the Mutual Fund will make all efforts, there is no commitment that this facility will be made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive IDCW payments , if any by cheques or demand drafts and the same will be mailed to the Unitholders. Please note that the ECS Facility is available only in respect of IDCW payments and not in the case of Redemption of Units. Therefore, the Investors will receive their redemption/ IDCW proceeds (if any) directly into their bank accounts in the following order:

- (i) In case the bank account of an investor is covered under RTGS/NEFT system offered by the RBI then the payment of redemption/IDCW proceeds (if any) shall be effected via RTGS/NEFT mechanism only.
- (ii) The facility for payment of IDCW proceeds, if any via ECS* shall be effected only in case the bank account of an investor is not covered under the RTGS/NEFT system.

* available only in respect of IDCW payments.

Each of the above facilities aims to provide direct credit of the redemption proceeds and IDCW payouts (if any) into the bank account of the Unit holder and eliminates the time lag between despatch of the cheque, its receipt by the Unit holders and the need to personally bank the instrument and await subsequent credit to the Unit holders account. Further, the potential risk of loss of instruments in transit through courier/post is also eliminated. Each of the said facility as a mode of payment, is faster, safer and reliable. In case the bank account as communicated by the Unit holder is with any of the banks participating in the RTGS/NEFT System offered by RBI, the AMC shall automatically extend this facility to the Unit holders provided unitholders have furnished all requisite information to the AMC to receive such credits.
